

EASY CLOSE
AND LOCK

Fairfield 80 & 70

Fusion-Welded Vinyl Windows

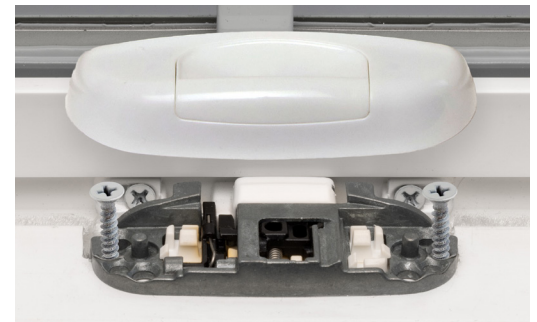

NEW Positive Action Auto Lock Option!

Heavy-duty locking mechanism makes it easy to close and lock the window in a single motion. As the moving sash closes, the locking mechanism is engaged by the keeper and firmly locks the sash in place.

- More metal surrounds the lock actuator, which provides greater stability for a better, more consistent operation
- Stainless steel springs resist effects of coastal or humid environments
- Endurance tested to over 36,000 operating cycles
- Passes forced entry requirements for sliding and hung windows
- PAL can be converted to an ADA PAL lock by replacing the cover
- Available on Fairfield 80 and 70 sliding and single-hung windows

UPSCALE APPEARANCE

The beautifully designed cover conceals the screws that secure the locking mechanism to the reinforced sash, creating a clean, modern-classic aesthetic with no unsightly screws.

NEW ADA PAL OPTION

Our ADA PAL option features a matching cover design, with an adjustable pull cord to disengage the lock for easy operation and ADA compliancy.
