EUROFINISH

Premium Colors

Today's contemporary designs and classic craftsman style architecture favor deep rich colors. Coeur d'Alene's Euro-finish features a low gloss matte finish with just enough texture to give your project that custom feel. Choose our always in stock black or bronze finishes, one of our standard rich colors or if you are in the custom mood, create your own color and we will match it.

The Coeur d'Alene Advantage

At Coeur d'Alene Windows, we finish products in our own state-of-the-art manufacturing facility. Our process is as follows:

First, the substrate is thoroughly cleaned and prepared for the booth. Next, the product enters our clean segregated room for finishing. After finishing, the product is cured under intense heat. Finally, the product is packaged to protect the finish in transit to the jobsite.

Coeur d'Alene's finishing process has been thoroughly tested. Having passed stringent AAMA tests (AAMA 613-17a - Organic Coatings on Plastic Profiles) The Coeur d'Alene Window Company is listed on AAMA's Verified Components List, something few manufacturers can say. Coeur d'Alene Windows passed all sixteen individual tests associated with the AAMA test covering areas such as adhesion and impact resistance.

Safe and Better for the Environment

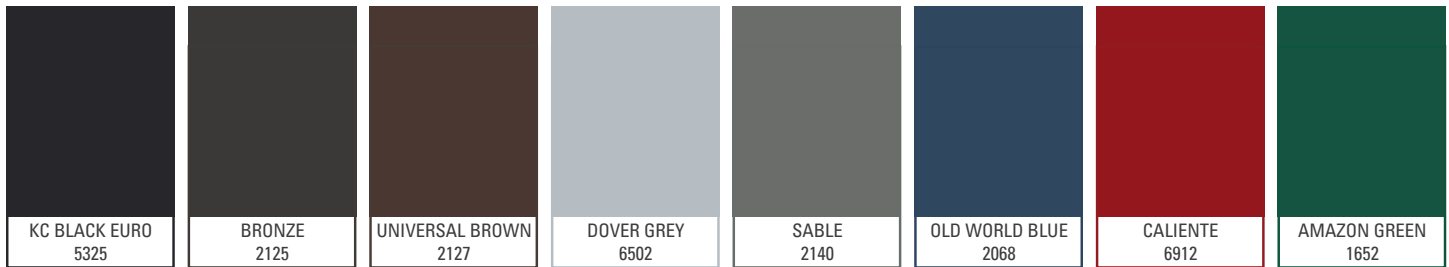

Euro-finish from The Coeur d'Alene Window Company is an ultra-low VOC finish. Euro-finish is lead, chromate, isocyanate and pyrrolidone free. It allows for safe processing and finishing; yet performs to the highest standards in the field. In addition, Euro-finish is chip, peel and blister resistant.

STANDARD COLORS

Choose black, bronze or one of our other six standard colors to make your project unique. Euro-finish is available on the exterior or both the interior and exterior (longer lead times apply).

** Actual Colors may vary. Do not use the brochure to confirm color - Please consult actual color chips/samples.*

	Finish Warranty	Frame Warranty	Touch-up	Where Finished	Handling	Third Party Verified
Eurofinish	10 Years Including Fade Protection	No Change	Easy Match	Factory	No Additional Handling	AAMA Tested
Other Finishes	?	?	Difficult	In House or Third Party	Additional (w/ 3rd party)	?
